

### **What Makes Humphreys Different?**

All Humphreys remedies use time honored, natural methods for caring for the body in the gentlest ways possible. In keeping with traditional practices, Humphreys remedies utilize traditional spherical pellets instead of more modern pressed or extruded tablets. Unlike other tablets that dissolve instantly, these pellets dissolve more gradually, allowing for proper absorption of the natural ingredients through the mucous membranes in the mouth and digestive system.

All Humphreys pellets are completely lactose-free and are made from 100% sucrose. Since infants' newly developing digestive systems are especially sensitive, lactose is sometimes a concern for mothers. Sucrose is easily digestible and offers a great tasting alternative that children enjoy – and now with the addition of natural Cherry and Berry flavors, Humphreys offers even more choices that children and mothers will love.

### **An Effective, Natural Combination of Ingredients**

Humphreys Teething Pellets #3 in flavorful Very Cherry and delicious Very Berry are two of the latest products from Humphreys Pharmacal, containing natural ingredients to help soothe discomfort while teething. All Teething Pellets #3 contain an effective blend of Chamomile for irritability, Coffee Seed for wakefulness and diuresis, Belladonna for redness & inflammation, and Calcium Phosphate to support dentition. This is a winning combination that mothers have been relying upon for decades! And now, with the addition of natural Cherry and Berry flavors, Humphreys has created two new delicious choices for parents to help calm and soothe their teething children.

“Humphreys new flavored teething remedies reach a broader demographic of parents who might never have considered a natural remedy for their children. By offering children’s remedies with the added value of natural flavors, we are able to offer a more attractive alternative to other conventional (allopathic) flavored products than traditional unflavored natural remedies,” said Bryan Jackowitz, Marketing Manager for Humphreys.

### **So Easy to Use**

Simply place 1 to 3 pellets in a half-teaspoon of warm water and allow to dissolve, then apply the slurry to the child’s gums. If needed, repeat every 2 hours, up to 4 times a day. If preferred, Teething Pellets can be administered under the baby’s tongue. In persistent cases, the baby can be given 3 pellets one hour before bedtime, and then repeated in one hour. This easy-to-use, safe remedy temporarily relieves the minor irritation, pain, and wakefulness usually associated with teething in infants. Every household should have this soothing, calming remedy in its child’s nursery.

### **Humphreys Pharmacal: For Today’s Families**

Since 1854, the Humphreys Family has produced the highest quality natural products for personal care and skincare. Originally formulated by the respected homeopathic physician, Dr. Frederick Humphreys, M.D., all of our products are based on traditional, time-honored botanical ingredients to care for your family in the gentlest ways possible. We continue to produce our products in the same manner, harvesting many of our natural ingredients by hand and utilizing time-honored processing techniques – resulting in therapeutic products that work with your body, encouraging it to return to a natural state of health. Humphreys Flavored Teething Pellets are the latest in the Humphreys’ legacy of wholesome, natural wellness products, and continue to build on Humphreys’ history and longstanding tradition of safe and effective products for the entire family.
